

Websvn Version Control Software

WebSVN

Websvn is a web-based version control system, which allows users to collaborate on software projects and track software version history

Websvn Version Control Software

Powered by WebSVN 2.6.0 and Apache Subversion 1.14.2 ✓ XHTML & CSS

```
(kaliⓀkali)-[~]  
$ searchsploit websvn 2.6.0
```

Exploit Title

Websvn 2.6.0 - Remote Code Execution

This version of Websvn is vulnerable
to a known exploit

Privilege Escalation

Sudo C99

The C99 program is a C compiler that provides a consistent way to compile C programs in a way that adheres to the C99 standard

Privilege Escalation

Sudo C99

```
sudo c99 -wrapper /bin/sh,-s .
```

If we can run the C99 program with Sudo, we can escalate our privileges if we use a command like the example above

Privilege Escalation

Sudo SSH-Agent

The SSH-Agent program is a background utility that manages private keys used for SSH authentication

Privilege Escalation

Sudo SSH-Agent

```
sudo ssh-agent /bin/
```

If the SSH-Agent program can be run with Sudo, we can escalate our privileges by using a command similar to the example above
