

URL Redirection

```
<?php
// In index.php
header("Location: redirect.php");
exit();
?>
```

URL redirection is a feature of webpages that causes requests to a webpage to be redirected to another webpage

URL Redirection

```
* upload completely sent off: 28 bytes
< HTTP/1.1 302 Found
< X-Powered-By: Express
* Need to rewind upload for next request
< Location: /next-page/id=cGljb0NURntwcm94aWVzX2Fs
< Vary: Accept
< Content-Type: text/plain; charset=utf-8
```

All HTTP response codes in the 3XX range indicate a redirection, and the Location header tells the browser which URL to redirect to
